SUMMARY

Unity game programmer (1.5+ years professional, 4+ years hands-on) with a first-class BSc (Hons) in Games Technology. Shipped and maintained gameplay systems in C# for a live remote-first studio, with hands-on experience across Firebase authentication, Git-based workflows, and cross-platform release testing. Comfortable working async across time zones, iterating quickly from playtest feedback, and using AI-assisted tooling to move faster through design, debugging, and documentation.

TECHNICAL SKILLS

- Languages & Engines: C# (Unity), Unreal Engine 4/5 (basic), Python (basic), SQL (basic), HTML/CSS
- Unity: gameplay systems, UI/UX implementation, animation & spawn systems, mobile/WebGL optimisation
- Tools & Workflow: Git/GitHub, Firebase (Auth), Visual Studio, OBS Studio, Microsoft Office, Agile/Scrum basics
- Other: playtesting & QA, live production, remote collaboration, AI-augmented systems thinking

WORK EXPERIENCE

Game Programmer (Remote) — G.O.A.T Collectables, Malaysia

Jan 2025 – Present

- Develop and maintain gameplay systems in C# / Unity, focused on mechanics stability and player-facing polish.
- Integrated Firebase Authentication for secure sign-in and account flows, reducing manual account-support requests.
- Run cross-platform testing and performance passes before each release; collaborate with distributed artists and designers via Git-based workflows.
- Partner directly with designers/artists to turn concepts into playable, shippable features.

Solar Proposal and Design Coordinator — Vivid Vision (Pvt) Ltd, Sri Lanka

Nov 2023 – Dec 2024

- Used OpenSolar to create and manage solar layout designs while supporting technical workflow and project coordination.
- Maintained and organised project data in Microsoft Excel, ensuring accuracy in records, proposals, and reporting.
- Collaborated with internal teams to support digital documentation, data handling, and operational efficiency across solar project tasks.

IT & Game Development Specialist — Freelance

Oct 2022 – Jun 2024

- Built and shipped Unity prototypes (core mechanics, UI, spawning/animation systems) used as live playtest builds.
- Produced and streamed development content and playtests to a live audience; used direct viewer feedback to prioritise fixes and balance changes.
- Delivered short-term freelance data entry/cleanup projects alongside development work, maintaining accuracy under tight turnarounds.

Data Clerk → System IT Administrator (Intern) — Zavy Technologies, Malaysia

May 2021 – Sep 2022

- Managed and cleaned datasets in Excel with high accuracy; proposed process changes that reduced recurring data errors.
- Promoted to intern IT administrator: implemented monitoring for uptime/performance and ran backups and preventive maintenance.

EDUCATION

BSc (Hons) in Games Technology, First Class — Limkokwing University of Creative Technology

2020 – 2023

CGPA: 3.87 / 4.0

Foundation in Information Technology — Limkokwing University of Creative Technology

2019 – 2020

CGPA: 3.99 / 4.0

CONTINUOUS LEARNING

- AI/ML Engineer certificate program, SLIIT (in progress)
- Introduction to C++ Programming and Unreal, Coursera (Mar 2023)
- Introduction to C# Programming and Unity, Coursera (Oct 2022)
- Self-directed study in Unity, Firebase, and networking (2022–2025)
